

# Campus Social App

Authors: Alandis Patterson, Andre Perez, Jo'Marion Ford-Campbell, Stacey Jefferson Jr., and Victor Nguyen

## **Problem Statement:**

You are a new student on UofSC's campus, and you want to start networking with others, but you are having trouble connecting with people, or you are having a problem with finding things to do on campus. Our solution is to create an app that allows users to connect with their peers, professors, alumni, clubs, workplaces, etc... on campus.

## **4 W's:**

### **Who is experiencing the problem?**

Campus users who don't know what activities/groups are in the area that are available to be a part of.

### **What is the Problem?**

There is not an easy way to connect with people and different activities on campus

### **Where does the problem present itself?**

On UofSC's campus.

### **Why does it matter?**

It matters because if we can create a solution to this problem, then we can have many people connect/communicate with others easily, and it can allow people to see what more there is to do on campus.
