<u>Semester Project Part 1: Topic Selection</u>

By Stacey Allen Jefferson

Website Name: Styling Trends of Elegance.

Description: The website I have chosen to create will be for a business called Styling Trends of Elegance. It is beauty and cosmetics store that sells AVON products for both males and females. On this website, users will be able to get familiar with the owners and AVON Representatives as well as travel to their AVON page to view their products. There will also be calculators on the website, which is a simulator that adds the prices for customers, so they can spend their money wisely. This will not be an easy task, but I am certain we will accomplish this goal.

Page names:

1. Meet Our Lovely Representatives
2. What is Styling Trends of Elegance?
3. What is AVON?
4. Product Showcase
5. AVON Products for Men
6. Shop Cart Simulator

The Shopping Cart Simulator will be the page that stores data and manipulates for users as they will be allowed to type their desired products into input box made via JavaScript. They will be able to place their name and a maximum of ten products they would like to buy. From there, it will add up the total price the user will pay if they decide to go along with what they want.
